Ingot & Bar Capabilities

Forgemasters

Ingot & Bar Capabilities

Sheffield Forgemasters produce high quality forged steel ingot and bar in a variety of sizes, shapes and grades.

Our integrated melt facilities, along with years of research and development, allows us to produce accurately specified steel ingot and bar in a variety of steel grades. Each stage within the melting operation is monitored by highly trained technicians and operatives to guarantee a clean steel practice.

Depending on size, ingot & bar can also be delivered 'hot' to UK customers, reducing the need for further heat treatment.

Key Capabilities

Ingot

- Rounds, Octagons, Rippled and Multi-Fluted
- Sizes available from 35 up to 285T
- Lengths up to 4,800mm

Bar

- Available in many forms including Black (as forged), Heat Treated, Turned, Ground, Milled, Bored, Honed, Step Turned or Fully Tested.
- Sizes available from 35T up to 285T
- Lengths up to 4,800mm

Applications

Steel Stockholders | Forging | Processing | Manufacturing

Ultra-Clean Steel from our Integrated Melt Shop

Ingot Capability from 35T up to 285T
